

NURSING

YOU CARE ABOUT OTHERS AND THEIR WELL-BEING. YOU'RE A HEALER AND AN ADVOCATE FOR BETTER HEALTH. NURSING IS MORE THAN JUST A CAREER FOR YOU — IT'S YOUR CALLING.

Whether you plan to pursue clinical-based practice, teaching, research, or leadership in the healthcare industry, our direct-entry program will help you get there. Our graduates have risen to the top of the profession, working for the most elite hospitals in the country.

WHAT WILL I STUDY?

Combining innovative technology and hands-on clinical experiences, your **Bachelor of Science** in Nursing will give you the skills needed to provide the highest quality bedside care. You'll gain in-depth knowledge of the biological and behavioral sciences; take courses on nursing management and community health; travel to foreign countries to gain an understanding of health, illness, and disease in a global context. Our goal is to prepare you with a broader scope of the practice, giving you insights into the social issues that affect patient care and impact healthcare delivery.

EXCEL ON THE NCLEX

Florida Southern-trained nurses boast a **100 percent first-time pass rate** on the National Council Licensure Examination for Registered Nurses (NCLEX-RN) — significantly higher than the national average.

COMPASSION & EXPERTISE

Our curriculum is continuously evaluated and updated to include the most advanced patient-care procedures. Partnerships with local providers and connections with nursing organizations provide unlimited opportunities for personal growth, ensuring you gain the insights and skills needed to improve the health and well-being of your patients.

STATE OF THE ART FACILITIES —

Our treatment simulation labs contain high-tech mannequins that are able to speak, hear and respond to our actions, physiologically reproducing true-to-life scenarios.

EXTENSIVE CLINICAL EXPERIENCE —

After you master your skills in the labs, you'll have the chance to intern in a diverse array of settings, ranging from clinics, to rehabilitation facilities, to some of Florida's busiest and most technologically advanced acute care hospitals.

A SENSE OF COMMUNITY — Our campus brings together nursing students through several extracurricular organizations. On our campus you will find chapters of Sigma Theta Tau, the nursing honor society, and the Florida Student Nurses Association, which offers opportunities for community service and professional development.

“ I had an incredible experience at Florida Southern. I found a strong support network through my advisors, faculty, and clinic supervisors.”
