

PSYCHOLOGY

WHAT IS THE RELATIONSHIP BETWEEN MIND AND BODY? BY APPLYING THEORETICAL CONCEPTS AND EXAMINING THE EXTERNAL ENVIRONMENT YOU CAN USE YOUR ANALYTICAL SKILLS TO UNDERSTAND AN INDIVIDUAL'S BEHAVIOR.

Psychologists are people-oriented and naturally inquisitive about patterns of behavior and the way the mind works. Through your studies, you will be able to answer questions you have about yourself and others.

WHAT WILL I STUDY?

Whether you choose to pursue a **Bachelor of Art** or **Bachelor of Science in Psychology**, you will gain a deeper insight into the thought, emotion, and behavior while strengthening your interpersonal and analytical skill set.

EXPLORE THE HUMAN PSYCHE

Psychology is both an applied and academic field, meaning that you can't uncover all you need to know in a textbook, you'll need to explore for yourself. There are many clinical and counseling organizations in the surrounding area that you can intern with, providing hands-on learning opportunities and the insight and skills needed for further studies or a career in the field.

100% PLACEMENT

We are proud to boast a 100% graduate school acceptance rate for our majors. Many of our students choose to pursue higher degrees (MA, MS or PsyD) at prestigious institutions such as Emory University.

ARE YOU THINKING WHAT WE'RE THINKING?

Whether you plan to immediately enter the workforce or enroll in a graduate program, we'll get you the hands-on experiences and professional connections you need.

EXPERT FACULTY —

Our professors hold membership in organizations such as the American Psychological Association, the Association of Psychological Science, the National Institute on the Teaching of Psychology, and the Society of Industrial and Organizational Psychology.

OPPORTUNITIES TO COLLABORATE —

Working with your peers and faculty, you'll have the opportunity to collaborate on research projects. These projects result in professional presentations at regional and international meetings in the field as well as publications within peer review journals.

A WORLD OF INSIGHTS —

Do different cultures affect human behavior? Florida Southern hosts a number of study abroad opportunities to allow students to understand why people act the way that they do in Europe, Latin America, Asia, and Oceania.

MARINE MAMMAL TRAINING OPPORTUNITIES

Psychology isn't all about humans, it can be about animals as well! Many of our students are interested in marine mammal training, and our Central Florida location provides numerous opportunities for this highly-competitive internship experience.

Our students have interned at:

- Sea World
- MOTE Marine Laboratory
- The Tampa Aquarium
- Miami Seaquarium
- Marineland
